NEW **MUD HOG M/T**

The Kanati Mud Hog boasts an aggressive tread design, primed for challenging natural terrains. Whether tackling mud or navigating rocky landscapes, the Mud Hog is crafted to enhance your off-road escapades. With a spacious void ratio for effortless debris removal and a broad footprint for exceptional grip and braking ability, you can confidently conquer any terrain during your off-road and overland journeys.

CANAIMAGLOBAL

WIDECLIMBER M/T2

- Three-ply sidewall protection and sidewall traction bars
- Aggressive traction and control
- Reinforced rubber belt that delivers load-bearing durability over a range of applications

WIDECLIMBER AWT

The Suretrac WideClimber AWT Offers The Looks Of A Rugged Terrain Tire While Offering Better On-Road Performance. The Suretrac AWT Tire Delivers The Perfect Balance Between A Rugged Terrain And All-Terrain Tire.

RADIAL A/T2

The tire offers a secure all weather traction. The detailed tread design and the all season compound increase the dry, wet and winter weather grip on the road and terrain surface.

WIDECLIMBER R/T2

Offers great on-road handling, comfort and a quiet ride of an all-terrain tire while having the rugged off-road capabilities of a pure mud-terrain tire. This makes it the best of both worlds for drivers.

HAIDA

CANAIMAGLOBAL

HD829 **A/T**

Unique, streamlined, and radial pattern design increases the ability of water breaking to reduce hydroplane and quickly eliminates the road water to improve wet handling.

HD869 **M/T**

Open shoulders and angled tread blocks force mud, rocks, dirt, stones, slush, water, and unwanted debris out of the tire for reduced risk of hydroplaning and promote consistent traction, and the HD869 M/T's tough rubber compound guards the tire against puncture, chips, and cuts to promote a longer tread life.

HAIDA

CANAIMAGLOBAL

HD828 A/T

This model offers secure controllability. The ideal tread pattern increases the tire's surface contact and boosts steering responsiveness and driving stability. This enables a faster and more precise steering response to the driver's commands, while the structure is secured against driving pressure.

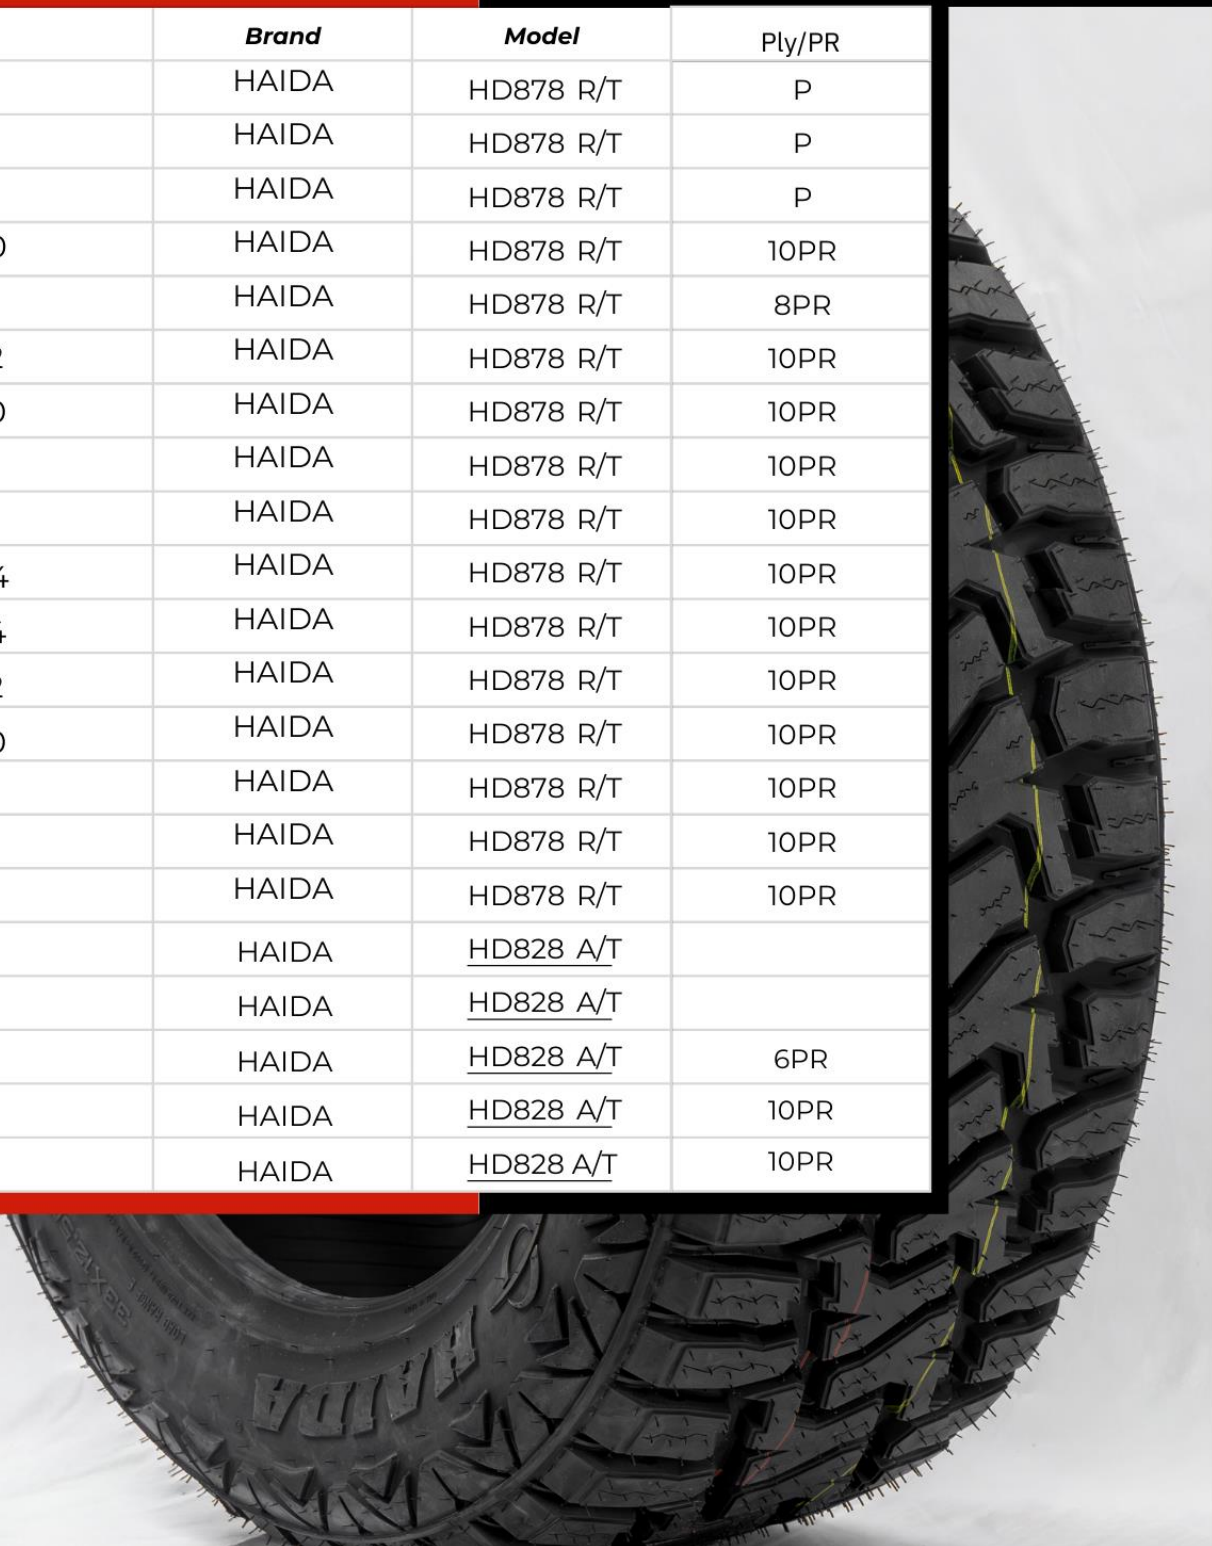

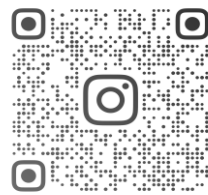

HD878 R/T

Wide shoulder pattern design ensures safe passability for the vehicle on any severe road condition. The unique wide pattern provides grip force and handling performance. The anti-collision wall prevents punctures, road collision and pressure damage.

HAIDA

CANAIMAGLOBAL

HD617 WINTER

Includes a wide design and pattern with new 3D sawtooth-style, fine sipes, manufactured to provide excellent performance on ice and snow. The sawtooth sipes provide improved grasp area and grasp force, improving handling in even the most slippery conditions.

HD677 WINTER

3D grooves increases the contacting area and improved the grip on ice and snow. Improved Traction - Optimized design arrangement of stud holes improves traction and steering plus reduces noise

HD687 WINTER

The Haida HD687 is a touring, winter tire made for passenger vehicles and SUVs. The asymmetric tread design and the special compound increase traction on ice- and snow-covered roads, while the zigzag grooves prevents hydroplaning.

iLINK

MULTIMATCH

Unique directional, streamlined, and radial pattern design increases the ability of water breaking to reduce hydroplane and quickly eliminates the road water to improve wet handling.

POWERCITY 79

Designed lateral grooves and multiple sipes for balanced block rigidity, provide excellent drainage performance, ensure good handling performance in rain or snow.

SPEEDKING 07

Central longitudinal ribs increase the contact area with road surface, and enhance braking performance in any road conditions.

THUNDERU09

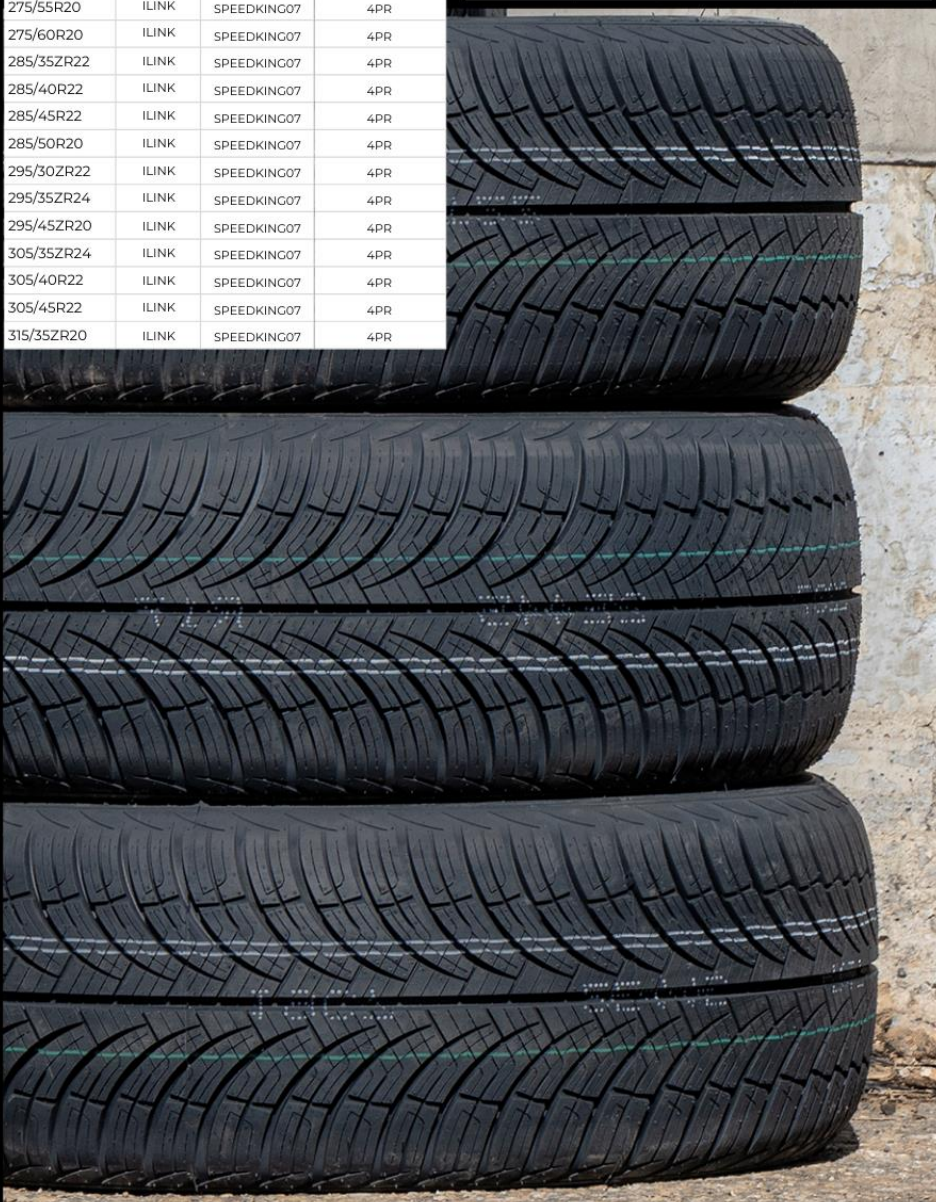

The New Silicon tread compound enhances grip in wet road conditions and reduces rolling resistance.
